## Introduction

Hi!

My name is Oliver Ohene-Dokyi (OOD)

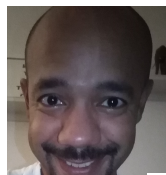

This guide contains a quick overlook upon why greengeeks is one if not the best green host for wordpress websites.

You can also check out the content inside my wordpress blog at:

<http://oliverohenedokyi.com/greengeeks-optimized-wordpress-hosting/>

Wishing you PEACE & LOVE,

Oliver Ohene-Dokyi

## REASON # 1: Eco-Friendly

### 1 Eco-Friendly

- no waste of resources mindset

- 300% in renewable energy credits

for every amperage greengeeks pulls from the grid, they invest 3 times that in the form of renewable energy via the [Bonneville Environmental Foundation](#)

- Carbon reducing when using their platform!

Also see green geeks on the [epa green power partnership list](#)

## REASON # 2: Website Speed Optimization

- Greengeeks wordpress hosting comes with the fastest website loading time

- CloudFlare powered free CDN

What is CDN And Why Is This Good?

CDN stands for Content Delivery Network

A content delivery network or content distribution network is a geographically distributed network of proxy servers and their data centers. The goal is to provide high availability and high performance by distributing the service spatially relative to end-users.

(a system of distributed servers (network) that deliver pages and other Web content to a user, based on the geographic locations of the user, the origin of the webpage and the content delivery server... more on wikipedia about CDN here: [https://en.wikipedia.org/wiki/Content\\_delivery\\_network](https://en.wikipedia.org/wiki/Content_delivery_network))

Your website will cache your content and serve it from servers.

A close connection to your visitors for faster web serving.

- latest network protocol for significantly faster page loads in-browser  
GreenGeeks were one of the first to adopt PHP 7.

- faster PHP executions with PHP7 enabled on all servers

- fast page load using and maximum redundancy  
Solid State RAID-10 Storage Arrays

### **REASON # 3: Scalable Hosting**

ONLY upgrade your computing resource when you need to!

No need for expensive and unneeded VPS ([Virtual Private Servers](#))

### **REASON # 4: Real-Time Security Scanning**

- Linux Secure vFS

- Hosting Account Isolation

- Advanced Clustered Threat Analysis

- Pro-active Server Monitoring

### **REASON # 5: Over Thirty Five Thousand Clients**

Yes sounds like there should be many more

35,000+ Clients already use green geeks web hosting platform
